

# European Road Safety Atlas

Measuring and mapping the safety of Europe's roads

All mapping is based on the number of fatal and serious collisions. Mapping for Austria is for motorways between 2000-2003; Czech Republic, national roads, 2006-2008; Poland, national roads, 2006-2008; Slovakia, national roads, 2006-2008. A statistical adjustment correcting for differences in reporting and definitions between countries ensures that results are comparable.

**Risk Rating**  
Fatal and serious accidents per billion vehicle kilometres

- High risk roads
- Medium-high risk roads
- Medium risk roads
- Low-medium risk roads
- Low risk roads
- Unrated roads
- International Boundary
